

REMARKS

In response to an Office Action mailed August 1, 2008 in which the Examiner has stated that the submitted claims are directed to a "hydraulic piston" which are not shown in the figures, the Applicants have amended independent claim 1 to delete reference to the "hydraulic piston rod".

However, the Applicants respectfully point out that while the Examiner has stated that the piston is not shown in figures, the Applicants respectfully request the Examiner's attention to be drawn to character reference "1" in the figure and reference thereto on page 4, last paragraph, wherein it is stated "...a movable machine part 1 which is herein formed as a cylindrical piston rod"...

The Examiner has also stated that the latest amendment to claim 10 does not correspond to the original electrical invention filed on 12/19/09 or 5/30/06. That amendment set forth in claim 1 as:

"Sealing arrangement for hydraulic pistons or piston rod comprising a U-cup (3) of a visco plastic synthetic material, a stationary machine part (2) and a movable machine part (1) with an outer radius R..."

Presently, claim 10 states that:

"Sealing arrangement comprising a U-cup of a visco plastic synthetic material, a stationary machine part, and a movable machine part with an outer radius R..."

Accordingly, claim 10 corresponds with original claim  
1.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'W. Hackler', with a long horizontal line extending to the right.

Walter A. Hackler, Reg. No. 27,792
